

ASTIC INSULATION MATERIALS INDUSTRIES L.L.C.

DEFINING INDUSTRIAL SOLUTIONS

INTRODUCTION

ASTIC INSULATION MATERIALS INDUSTRIES LLC (AIMI) is registered as a Limited Liability Company setup in 2012 in DIP / 2, Dubai, UAE, to be conditioned under the laws of Emirates of Dubai, U.A.E to provide quality and prompt service.

AIMI is a locally registered Industrial Company, listed by the Ministry of Industries under License No.666246 (copy attached). The company is setup in Dubai Investment Park and is engaged into the activity of Insulation Manufacturing especially PIR, PUF, Phenolic Foam, Foamglas, Calcium Silicate etc.

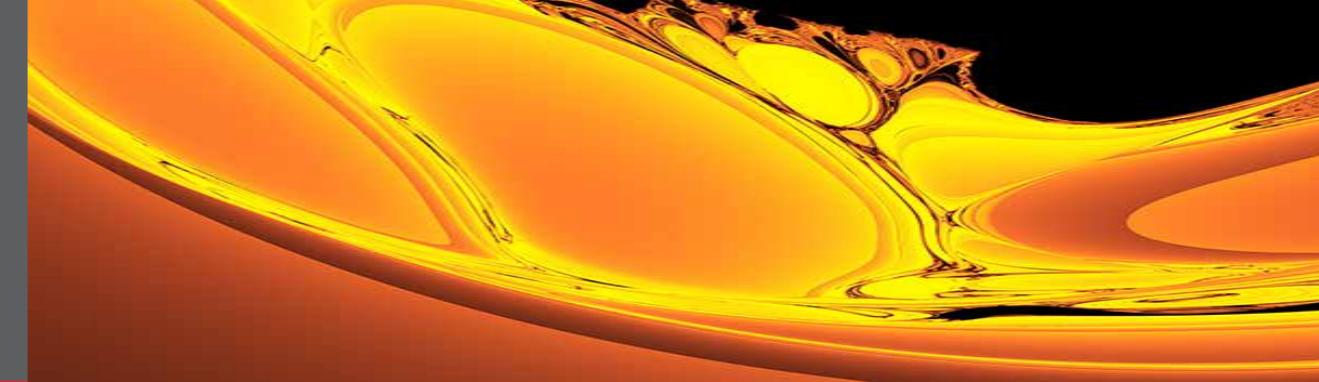

AIMI is specialized in manufacturing, fabrication, field fabrication and execution of insulation work. Preformed sections can be made available on all types of Rigid insulation for piping, fittings, flange & valves, boxes, vessels, equipments for Cellular Glass (FOAMGLAS® INSULATION) Polyisocyanurate Polyurethane (PIR/PUR), Phenolic Foam, Calcium Silicate which are widely used in Oil and Gas Industries. Petrochemical Industries, Power and Desalination plants and several other related industries. The same can be used for Commercial Buildings for district chillers, boilers piping and roofing where high specification is applied.

Above mentioned Insulation Materials are specified in the specifications for the above mentioned Industries and for projects in U.A.E. and all the Gulf countries, which led us to start our own production unit, with our own expertise specialist to meet the highest standard & market demands. AIMI is an approved source with the local Oil & Gas companies like Takreer Gasco, Borouge, DEWA, ADEWA & Dubai Municipality Central Laboratory.

We adhere to the highest standards by sourcing raw materials from globally well-known manufacturers such as Pittsburgh Corning for Foamglass and BASF, DOWCHEMICAL for Polyisocyanurate and Polyurethane.

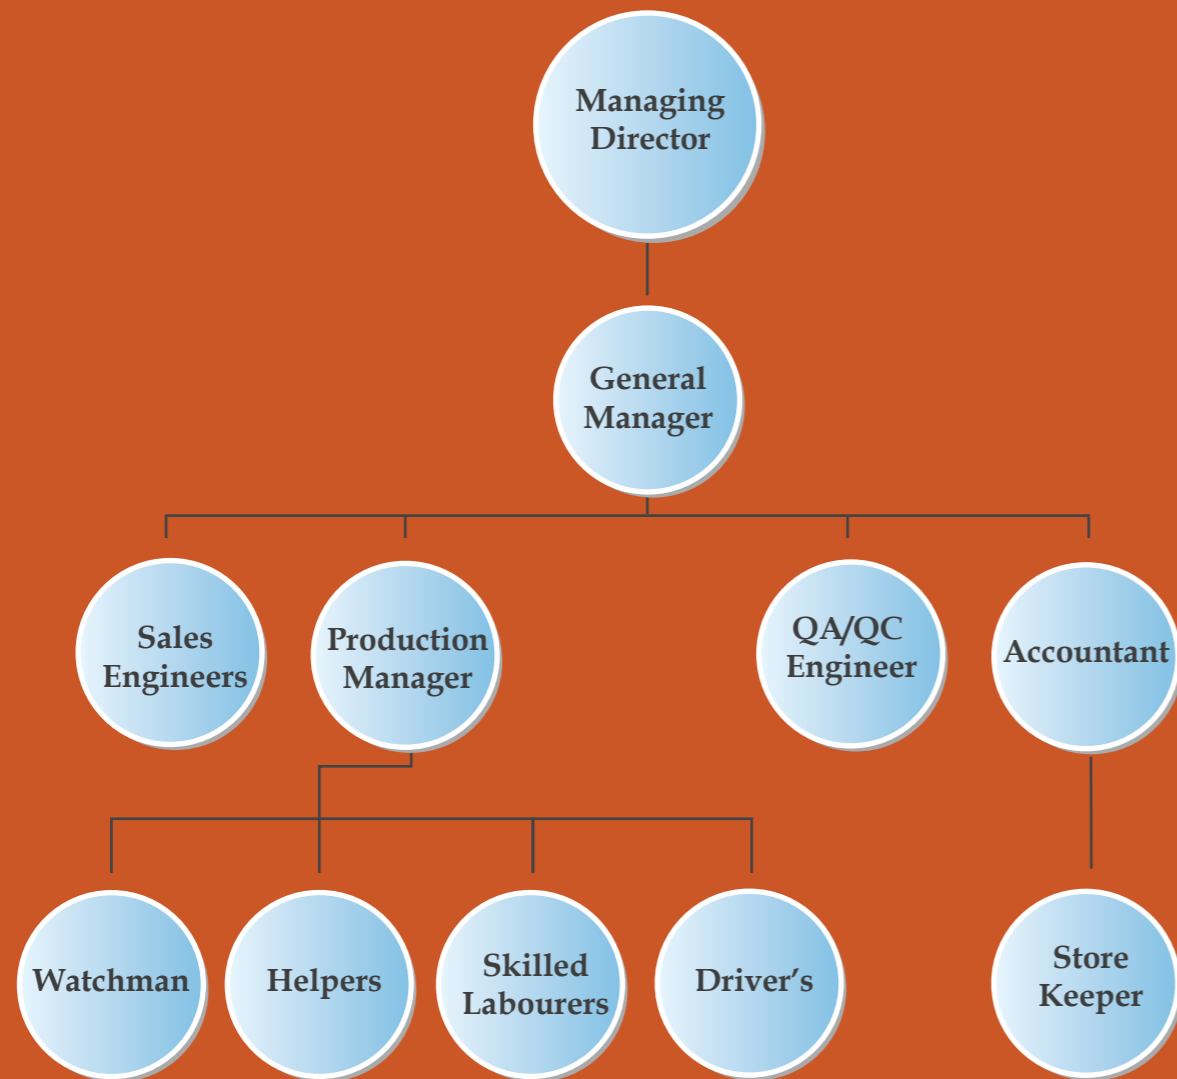

Our factory is equipped with the most up to date automated machines to make available insulation for Piping, Fittings, Elbows, Flanges, Valve Boxes and metal jacketing. Our main advantage is having a local facility in Dubai & capability to handle quick delivery to the Gulf region & Middle East with economical cost and can issue a GCC Certificate as local Manufacturer.

PRODUCTS OVERVIEW

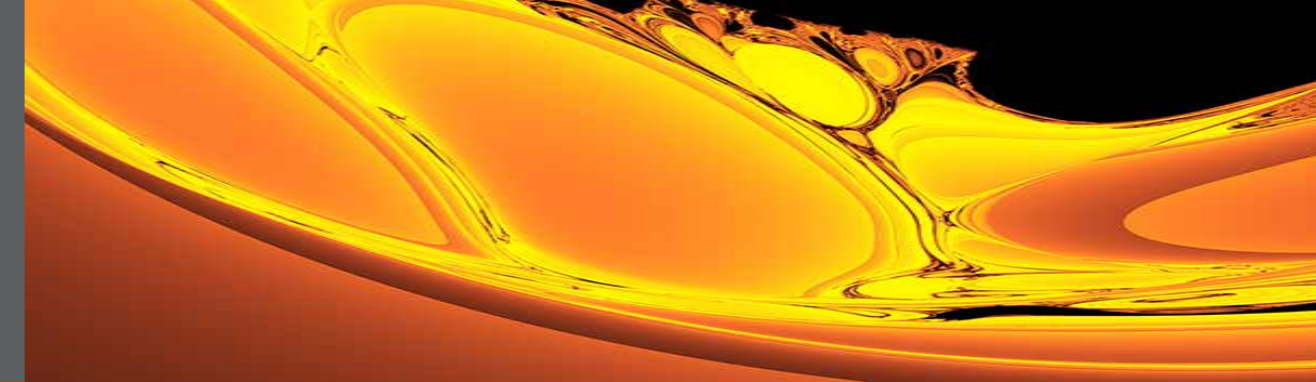

COMPANY STRUCTURE

Our current workforce strength is 150 employees and growing

- > FOAMGLAS®
- > ALFA PIR POLYISOCYANURATE FOAM
- > ALFAPHEN
- > CALCIUM SILICATE
- > ROCKWOOL
- > CERAMIC BLANKET
- > FIBERGLASS INSULATIONS
- > JACKETING
- > HARD ACCESSORIES
- > WET ACCESSORIES

CERMIC BLANKET

Ceramics offers a wide range of fibre blanket products in a wide range of chemistries, densities and thicknesses Ceramic Blanket Insulation for High temperature Insulation upto 1200 Deg. C.

The blankets exhibit the following characteristics:

- > low thermal conductivity
- > excellent thermal shock resistance
- > low heat storage capacity
- > inorganic - smoke free

Available in Blankets with 96 kg/m³ & 128 kg/m³ density with thickness 1 inch , 1 1/2 Inch & 2 inch.

For more thickness required Multi Layers concentration can be used.

FIBERGLASS INSULATIONS

Fiberglass Insulations offers customized and cost effective, reflective, acoustical and fire resistant insulation products as per International Standards. It complies with EPA regulations and respects the environment during the manufacturing process. Its products highly contribute to energy saving. the following products are available:-

Available for typical field applications

- > Blankets with aluminum facing for thickness 25 mm upto 115 mm with density 12 kg/m³ up to 48 Kg/m³.
- > Boards with various densities 32 kg/m³ upto 96 Kg/m³.
- > Preformed Pipe sections from 1/2 inch pipe size to 24 inch with aluminum facing & densities 48 kg/m³ upto 96 kg/m³.
- > Duct Liner for Acoustical applications with BGT facing.
